What is the geomagnetic PC index?

Thursday 12 Jul 2012 at 17:30 (02h00')

Abstract :

The Polar Cap index (PC: PCN, northern; PCS, southern) is an index that describes energy input into the polar cap regions from the solar wind. The index is derived from ground-based geomagnetic measurements that have been normalized to insitu satellite measurements of the solar wind. This presentation will describe the index and its usefulness.

Award :

No

Paper :

Yes
