## **VieVS 2.3 - status of the Vienna VLBI Software and plans for the future**

Monday 14 Mar 2016 at 17:00 (01h00')

### **Content :**

The Vienna VLBI Software (VieVS) is a VLBI analysis software developed and maintained at Technische Universität Wien (TU Wien) since 2008 with contributions from groups all over the world. It is used for both academic purposes in university courses as well as for providing VLBI analysis results to the geodetic community. Written in a modular structure in Matlab, VieVS offers easy access to the source code and the possibility to adapt the programs for particular purposes. The new version 2.3, released in December 2015, includes several new parameters to be estimated in the global solution, such as tidal ERP variation coefficients. The graphical user interface was slightly modified for an improved user functionality and, e.g., the possibility of deriving baseline length repeatabilities. The scheduling of satellite observations was refined, the simulator newly includes the effect of source structure which can also be corrected for in the analysis. This poster gives an overview of all VLBI-related activities in Vienna and provides an outlook to future plans concerning the Vienna VLBI Software.

**Primary authors :** MADZAK, Matthias (Technische Universität Wien)

**Co-authors :** BÖHM, Johannes (Technische Universität Wien) ; MCCALLUM, Jamie (University of Tasmania) ; Dr. PLANK, Lucia (University of Tasmania) ; CAROLINE, Schönberger (Technische Universität Wien) ; Dr. SHABALA, Stanislav (University of Tasmania) ; Dr. SUN, Jing (Beijing Aerospace Control Center) ; TEKE, Kamil (Hacettepe University) ; BÖHM, Sigrid (Technische Universität Wien) ; Mrs. GIRDIUK, Anastasiia (TU Wien) ; Mr. HELLERSCHMIED, Andreas (Technische Universität Wien) ; HOFMEISTER, Armin (Technische Universität Wien) ; KRÁSNÁ, Hana (Technische Universität Wien) ; Dr. KWAK, Younghee (Vienna University of Technology) ; LANDSKRON, Daniel (Technische Universität Wien) ; MAYER, David (Technische Universität Wien)

**Presenter :** BÖHM, Johannes (Technische Universität Wien)

**Session classification :** Poster4-6

**Track classification :** 4: Data Structures and Analysis Strategies in the VGOS Era

**Type :** Poster Presentation
