Completing the K-band Celestial Reference Frame in the North.

Monday 14 Mar 2016 at 17:00 (01h00')

Content :

K-band (22 GHz) radio observations have the potential to form the basis for the most accurate celestial reference frame ever constructed. Relative to the standard S/X (2.3/8.4 GHz) observing bands, K-band is expected to exhibit a reduction in extended source morphology and core-shift. This reduction in astrophysical systematics should allow for a more stable celestial reference frame at K-band and should also be advantageous in tying the VLBI radio frame to the Gaia optical frame. The current K-band catalogue consists of only 274 sources from a few VLBA sessions and uncertainties in source positions at the ~100 micro-arcsecond level. Modern 2 Gbps data rates are 16 times better than previous observations, yielding a four fold increase in sensitivity. Southern observations to reduce astrometric systematics and to complete the sky coverage at K-band are under way. However, new astrometric and imaging observations are also required in the North to improve K-band precision and spatial coverage, and to map the intrinsic source structure so that their astrometric quality can be evaluated. A proposal for astrometric and imaging observations using the Very Long Baseline Array (VLBA) at K-band have been approved. We discuss some of our first results from our K-band VLBA campaign.

Primary authors : Dr. DE WITT, Aletha (Hartebeesthoek Radio Astronomy Observatory)

Co-authors : Mr. JACOBS, Christopher (JPL/NASA) ; Dr. BERTARINI, Alessandra (Max Planck Institut für Radioastronomie) ; Dr. QUICK, Jonathan (HartRAO) ; Dr. HORIUCHI, Shinji (C.S.I.R.O/Canberra Deep Space Communications Complex) ; Dr. LOVELL, Jim (University of Tasmania) ; Dr. MCCALLUM, Jamie (University of Tasmania) ; Dr. BOURDA, Geraldine (Laboratoire d'Astrophysique de Bordeaux) ; Dr. CHARLOT, Patrick (Laboratoire d'Astrophysique de Bordeaux)

Presenter : Dr. DE WITT, Aletha (Hartebeesthoek Radio Astronomy Observatory)

Session classification : Poster4-6

Track classification : 5: Geodetic and Astrometric VLBI Results

Type : Poster Presentation
