## **First results of the FAST-S/X-sessions with new VGOS antennas**

Monday 14 Mar 2016 at 15:45 (01h00')

### **Content :**

The organization of first fast slewing observations with new VGOS antennas was decided during the VTC meeting at Ponta Delgada. The goal was to observe S/X-schedules regularly, using the fast slewing capabilities of the antennas as long as they are equipped with classic S/X-capabilities. The poster/presentation discusses and shows first results of these observations.

**Primary authors** : Dr. NEIDHARDT, Alexander (Technische Universität München, Geodätisches Observatorium Wettzell) ; Dr. DE VICENTE, Pablo (Observatorio de Yebes (IGN))

**Co-authors** : Mr. HELLERSCHMIED, Andreas (Technische Universität Wien) ; Mr. MAYER, David (Technische Universität Wien) ; Mr. MELNIKOV, Alexey (IAA RAS) ; Mr. PLÖTZ, Christian (Bundesamt für Kartographie und Geodäsie) ; KRONSCHNABL, Gerhard (Bundesamt für Kartographie und Geodäsie) ; BERTARINI, Alessandra ( )

**Presenter** : Dr. NEIDHARDT, Alexander (Technische Universität München, Geodätisches Observatorium Wettzell) ; Dr. DE VICENTE, Pablo (Observatorio de Yebes (IGN))

**Session classification** : Poster1-3

**Track classification** : 2: VGOS Strategies and Expected Results

**Type** : Poster Presentation
