## New iThemba-LABS and Wits University Ion Implantation Facility

Wednesday, 10 July 2013 17:40 (1 hour)

## Abstract content <br > &nbsp; (Max 300 words)

Ion implantation is one of the most versatile techniques for preparing solid surfaces for many different applications – in physics, chemistry, engineering or even biology, as users of the former University of the Witwatersrand facility will be aware.

Wits has now joined forces with iThemba LABS (Gauteng) to acquire a "new" second-hand ion implantation accelerator in a joint venture, and to equip it with a universal ion-source able to produce beams from the entire periodic table. The facility has been installed and commissioned and is available for collaborative research, with a resident operator-technician.

Some of the current research is described.

Apply to be br> considered for a student br> award (Yes / No)?

No

Level for award<br/>
-&nbsp;(Hons, MSc, <br>
-&nbsp; PhD)?

N/A

Main supervisor (name and email) < br>and his / her institution

N/A

Would you like to <br > submit a short paper <br > for the Conference <br > Proceedings (Yes / No)?

No

**Primary author:** Prof. DERRY, Trevor (University of the Witwatersrand)

Co-authors: Dr NAIDOO, Mervin (University of the Witwatersrand); Dr MULLINS, Simon (iThemba LABS

(Gauteng))

**Presenter:** Prof. DERRY, Trevor (University of the Witwatersrand)

**Session Classification:** Poster2

**Track Classification:** Track F - Applied Physics
