Type: Oral Presentation

# Structural, electronic and thermal properties of Sn clathrates

Wednesday, 1 July 2015 11:30 (20 minutes)

### Abstract content <br> &nbsp; (Max 300 words)<br><a href="http://events.saip.org.za/getFile.py/starget="\_blank">Formatting &<br>Special chars</a>

Sn clathrates are promising "phonon glass, electron crystal" materials[1], in which the phonon free paths are short and the electron free paths are long. We analysed the relaxed structure of Sn clathrates using four different Density Funtional Exchange-Correlation functionals. The phonon structures were investigated as a first in the effort to determine the phonon contribution to the thermal conductivity. We determined the Seebeck coefficient and electrical conductivity of the clathrate compound and the Thermo Electric figure of merit. A peep into the dynamics of the system for the evaluation of the thermoelectric and electronic properties is presented.

### Apply to be<br> considered for a student <br> &nbsp; award (Yes / No)?

Yes

### Level for award<br>&nbsp;(Hons, MSc, <br> &nbsp; PhD, N/A)?

MSc.

#### Main supervisor (name and email)<br>and his / her institution

Daniel P. Joubert (daniel.joubert2@wits.ac.za)

## Would you like to <br> submit a short paper <br> for the Conference <br> Proceedings (Yes / No)?

Yes

## Please indicate whether<br>this abstract may be<br>published online<br>(Yes / No)

Yes

Primary author: Mr EGBELE, Peter (University of the Witwaterrand, Johannesburg. South Africa)

**Co-authors:** Prof. JOUBERT, Daniel (University fo the Witwatersrand, Johannesburg, South Africa); Dr SHOKO, Elvis (PSE Division, King Abdullah University of Science & Technology, Thuwal 23955-6900, Kingdom of Saudi Arabia)

Presenter: Mr EGBELE, Peter (University of the Witwaterrand, Johannesburg. South Africa)

Session Classification: TCP

Track Classification: Track G - Theoretical and Computational Physics
