## One and two dimensional models of dye adsorption for application in dye sensitized solar cells

Wednesday, 1 July 2015 10:20 (20 minutes)

**Abstract content &nbsp; (Max 300 words)<a href="http://events.saip.org.za/getFile.py/a" target="\_blank">Formatting & Special chars</a>**

The dye sensitized solar cells are currently the subject of intense research in the field of renewable energy as a low-cost photovoltaic device. The light adsorption occurs in dye molecules adsorbed on a highly porous structure of TiO<sub>2</sub> porous film. The progress in the efficiency and stability of these solar cells is very low, due to many fundamental aspects of their operation that are still unknown. One process, for which there is limited information, is the time taken to upload the dye on the TiO<sub>2</sub> nanoporous film which acts as a semiconductor. Dye molecule is adsorbed onto a TiO<sub>2</sub> working electrode by dipping it into the dye solution for periods of several hours to several days. However, such long dipping times are not economic for industrial production of DSSCs. The factors controlling this process are not yet fully understood. We have developed a 1D and 2D models based on the Langmuir isotherms to study and understand the diffusion and adsorption of the dye molecules in TiO<sub>2</sub> nanotube films. Our modelling results show that the adsorption of dye into the TiO<sub>2</sub> nanotubes is controlled by the diffusion coefficient, the adsorption-desorption ratio and the initial dye concentration.

**Apply to be considered for a student award (Yes / No)?**

No

**Level for award (Hons, MSc, PhD, N/A)?**

none

**Would you like to submit a short paper for the Conference Proceedings (Yes / No)?**

Yes

**Please indicate whether this abstract may be published online (Yes / No)**

yes

**Primary author:** Dr MALUTA, Nnditshedzeni Eric (University of Venda)

**Co-authors:** Mr MPHEPHU, Ndivhuwo (University of Venda); Prof. SANKARAN, Vaith (University of Venda)

**Presenter:** Dr MALUTA, Nnditshedzeni Eric (University of Venda)

**Session Classification:** TCP

**Track Classification:** Track G - Theoretical and Computational Physics
