Report on the current activities of GSI VLBI

Tuesday, 15 March 2016 11:55 (15 minutes)

The Geospatial Information Authority of Japan (GSI) has been operating Network Stations such as Tsukuba 32-m antenna, Tsukuba Correlator, and Tsukuba Analysis Center. Recently we started to operate a new VGOS antenna, Ishioka 13-m antenna, which will take over the role of Tsukuba 32-m antenna and, on the other side, stopped operation of the three regional antennas in Japan. GSI is now being actively involved in the Asia-Oceania VLBI Group for Geodesy and Astrometry (AOV) by using Tsukuba 32-m and Ishioka 13-m antenna and by correlating regular AOV sessions. We will talk on the current activities of GSI VLBI.

Primary author: Mr KAWABATA, Ryoji (Geospatial Information Authority of Japan)

Co-authors: Mr WADA, Kojin (Geospatial Information Authority of Japan); Mr ISHIMOTO, Masayoshi (Geospatial Information Authority of Japan); Mr WAKASUGI, Takahiro (Geospatial Information Authority of Japan); Mr FUKUZAKI, Yoshihiro (Geospatial Information Authority of Japan)

Presenter: Mr KAWABATA, Ryoji (Geospatial Information Authority of Japan)

Session Classification: Oral3: Stations, Correlators and Operations Centres

Track Classification: 3: Stations, Correlators, and Operations Centers
