## Status and first results from the VGOS-compatible antenna Ws with an Elevenfeed at Wettzell

*Monday, 14 March 2016 12:30 (15 minutes)*

The VGOS antenna Ws at Wettzell is equipped with an Elevenfeed, having a continuous frequency range from 2 GHz - 14 GHz. The receiving system with eight parallel intermediate frequency channels enables the use of four bands at different polarizations. A DBBC in combination with a FILA10G and a Mark6 System is used as backend. The presentation gives an overview about the current status of the broadband development and the recording systems installed at the Wettzell antenna Ws.

**Primary author:** KRONSCHNABL, Gerhard (Geodetic Observatory Wettzell)

**Co-authors:** Dr NEIDHARDT, Alexander (Technical University Munich); PLOETZ, Christian (Geodetic Observatory Wettzell); Prof. SCHUELER, Torben (Geodetic Observatory Wettzell); SCHWARZ, Walter (Geodetic Observatory Wettzell)

**Presenter:** KRONSCHNABL, Gerhard (Geodetic Observatory Wettzell)

**Session Classification:** Oral1: Advances in VGOS Stations and Technology

**Track Classification:** 1: Advances in VGOS Stations and Technology
