It has become essential to accurately measure the emission and uptake of atmospheric carbon dioxide (CO₂) around the globe. Atmospheric CO₂ plays a central role in the Earth's atmospheric, ocean and terrestrial systems and it has been recognized as the greatest contributor to the anthropogenic greenhouse gas effect. Monitoring of atmospheric CO₂ and other greenhouse gases has been identified as a priority by international agencies and governments departments that are interested in mitigating the effects of climate change. The Global Change and Ecosystem Dynamics research group of the Global Change competency area at the Council for Scientific and Industrial Research unit of Natural Resources and the Environment has been engaged in terrestrial carbon cycle research for over a decade. The group has also invested heavily in developing and adopting skills to monitor the concentration of atmospheric CO₂ using the traditional technique, notably the non-dispersive infrared spectroscopy (NDIR) analyzers and emerging laser based technique (Wavelength-scanned cavity ring-down spectroscopy (WS-CRDS) Analysers). This paper will report on the ambient concentrations of atmospheric CO₂ measured over three geographically different regions within South Africa, using the traditional technique at Skukuza and Malopeni flux towers in the Kruger National Park, and laser based technique employed at Elandsfontein and Lephalale within the Highveld and Waterberg air quality priority areas in the interior of South Africa and at the coastal site of Cape Point.

Apply to be
br> considered for a student
br> award (Yes / No)?

No

Level for award

- (Hons, MSc,

- PhD, N/A)?

N/A

Would you like to
 submit a short paper
 for the Conference
 Proceedings (Yes / No)?

Yes

Please indicate whether

-br>this abstract may be

-published online

-(Yes / No)

Primary author: Mr MUDAU, Azwitamisi (Natural Resources and the Environment)

Co-authors: Mr LABUSCHAGNE, Casper (South African Weather Services); Dr FEIG, Gregor (Council for

Scientific and Industrial Research)

Presenter: Mr MUDAU, Azwitamisi (Natural Resources and the Environment)

Session Classification: Applied Physics (1)

Track Classification: Track F - Applied Physics
