Subject: Response to referee's comments

Reference: "Electrical properties of alloy thin films on oriented MgO (100)" (id: 293)

Dear Sir,

This is in connection with our paper entitled "**Electrical properties of Cr<sub>100-x</sub>Co<sub>x</sub> alloy thin films on oriented MgO (100)**" (id: 293), submitted for SAIP 2014.

We have modified the text as suggested by the referee's. Our response to the referee's comments is as follows.

Referee's comments	Response to the referee's comments
1. Include the country in each affiliation	Country in each affiliation is included.
2. References to figures in the text should have 'figures' all lower case except when at the start of a sentence, as stipulated. Similarly, references to tables should take the form 'table n', not 'Table n'.	Text is modified as suggested.
i- change of title to make clear that T <sub>n</sub> of CrCo is obtained from their work.	The title of the paper has been now changed and it reads as " <b>Effect of dimensionality on the Néel temperatures of Cr-Co alloys</b> "
ii- include another inset in Fig 2, the one for x=3.8, or explain why it is not there	The inset in Fig.2 for x = 3.8 is included.
iii- include xrd measurements for all samples	XRD measurements for all samples are included.

Thanks,  
With regards,

Yours Sincerely,

Dr. M.B. Kadam
