## 63<sup>rd</sup> ANNUAL CONFERENCE OF THE SA INSTITUTE OF PHYSICS

Contribution ID: 226

Type: Oral Presentation

## A review of nuclear clustering formulation

Wednesday, 27 June 2018 10:00 (20 minutes)

Nuclear cluster models are a means to describe complex many body systems, specifically to predict nuclear structure properties within strongly correlated subsystem of nucleons. The binary cluster model has shown some success in predicting the alpha decay and spontaneous fission half-lives. A relativistic description of the Binary Cluster Model using the Dirac formulation treats spin correlations in a more natural way.

The objective of this study is to develop a fully microscopic description of the nuclear clustering based on a relativistic mean field theory. So doing, extending the application of the model to a greater range of observables, testing it in scattering phenomena and Colinear Cluster Tri-Partition (CCT). This presentation which gives an overview of binary clustering model and the formalism used identify the core-cluster partition and corresponding nuclear cluster observables. A comparison with existing phenomenological and non-relativistic Brueckner G-Matrix model predictions will be done.

## Please confirm that you<br>have carefully read the<br>abstract submission instructions<br>under the menu item<br>"Call for Abstracts"<br><b/(Yes / No)</b>

Yes

Consideration for<br>student awards<br>b>Choose one option<br>from those below.</b><br>N/A<br>Hons<br>MSc<br>PhD

MSc

## Supervisor details<br><b>If not a student, type N/A.</b><br>Student abstract submision<br>requires supervisor permission:<br>please give their name,<br>institution and email address.

Prof. Shaun M. Wyngaardt Stellenbosch University shaunmw@sun.ac.za

**Primary authors:** Mr KIMENE KAYA, Boniface Dimitri Christel (Stellenbosch University); Prof. WYN-GAARDT, Shaun (Stellenbosch University); Mr CAROLUS, Timothy Gary (Stellenbosch University); Dr IBRAHIM, taofiq (Stellenbosch University)

Presenter: Mr CAROLUS, Timothy Gary (Stellenbosch University)

Session Classification: Nuclear, Particle and Radiation Physics

Track Classification: Track B - Nuclear, Particle and Radiation Physics
