

63rd ANNUAL CONFERENCE OF THE SA INSTITUTE OF PHYSICS

Contribution ID: 223

Type: Oral Presentation

All Sky Imaging with PAPER

Thursday, 28 June 2018 12:00 (20 minutes)

The Precision Array to Probe the Epoch of Reionization (PAPER, <http://eor.berkeley.edu>) was built to measure the redshifted 21-cm line from cosmic reionization. Here, I will present the analysis of the last season of PAPER observations, with particular focus to image and characterize the foreground emission, a crucial task in order to detect the much fainter 21-cm emission.

Please confirm that you have carefully read the abstract submission instructions under the menu item "Call for Abstracts" (Yes / No)

YES

Consideration for student awards: Choose one option from those below.
N/A
Hons
MSc
PhD

MSc

Supervisor details: If not a student, type N/A. Student abstract submission requires supervisor permission: please give their name, institution and email address.

Prof Oleg Smirnov, Rhodes University, osmirnov@gmail.com

Primary author: Mr CHEGE, James (Rhodes University)

Presenter: Mr CHEGE, James (Rhodes University)

Session Classification: Astrophysics

Track Classification: Track D1 - Astrophysics
