63rd ANNUAL CONFERENCE OF THE SA INSTITUTE OF PHYSICS

Contribution ID: 149

Type: Oral Presentation

A comparative study of the high fluence neutron radiation effects on the structural and optical properties of plastic scintillator UPS 923A

Friday, 29 June 2018 10:20 (20 minutes)

We report on the optical and structural properties of plastic scintillators irradiated with a neutron beam produced by the IBR-2 reactor of the Frank Laboratory of Neutron Physics in JINR, Dubna. Blue and green shifting Ukraine polystyrene-based scintillators UPS 923A were irradiated with neutron fluence ranging from 3 x 10⁽¹³⁾ to 1.7 x 10⁽¹⁶⁾ n/cm² and neutron energy E > 1 MeV. Discolouring in the plastic scintillators was observed after irradiation. The effects of radiation damage on the optical and structural properties of the samples were characterized by conducting light yield, light transmission, light fluorescence and Raman spectroscopy studies. According to the results obtained, neutron radiation does influence damage in the material. The disappearance of the Raman peak features in green emitters at 1165.8, 1574.7 and 1651.2 cm⁽⁻¹⁾ revealed significant structural alteration due to neutron bombardment. We observed a loss in the fluoroscence intensity, light yield and light transmission in the plastics.

have carefully read the
abstract submission instructions
under the menu item
"Call for Abstracts"
<b/(Yes / No)

yes

Consideration for
student awards
Choose one option
from those below.
N/A
Hons
MSc
PhD

MSc

Supervisor details
If not a student, type N/A.
Student abstract submision
requires supervisor permission:
please give their name,
institution and email address.

Dr Chamunorwa Oscar Kureba Department of Physics and Astronomy, Botswana International University of Science and Technology, Private Bag 16, Palapye, Botswana kurebac@biust.ac.bw

Primary authors: Prof. MELLADO, Bruce (University of the Witwatersrand); Dr KUREBA, Chamunorwa Oscar (Botswana International University of Science and Technology); Prof. SIDERAS-HADDAD, ELIAS (University of the Witwatersrand); Mr MOKGATITSWANE, Gaogalalwe (Botswana International University of Science and Technology); Ms MDHLULI, Joyful Elma (University of the Witwatersrand); Dr ERASMUS, Rudolph (University of the Witwatersrand); Mr BARANOV, Vladimir (Joint Institute for Nuclear Research, Dubna, Russia); DAVYDOV, Yuri (Joint Institute for Nuclear Research, Dubna, Russia)

Presenter: Mr MOKGATITSWANE, Gaogalalwe (Botswana International University of Science and Technology)

Session Classification: Nuclear, Particle and Radiation Physics

Track Classification: Track B - Nuclear, Particle and Radiation Physics
