Type: Oral Presentation

Luminescent dynamics of $\text{GdTaO}_4\text{:Pr}^{3+}$

Tuesday, 10 July 2012 12:00 (20 minutes)

Abstract content
 (Max 300 words)

Rare earth tantalates (MTaO_4) with $M = \text{Gd}, \text{Y}, \text{La}$, are being extensively studied for possible applications in X-ray imaging systems and mercury free fluorescent lamps, and field emission display (FED) devices due to their high luminescence efficiency, physical and chemical stability, strong irradiation hardness and good X-ray absorption.^{1,2} In recent years, trivalent praseodymium (Pr^{3+}) doped materials displaying red persistent luminescence are of considerable interest in the development of long persistent materials.³ In addition, the energy distribution of the defect levels within the forbidden region of these compounds is determined using thermoluminescence (TL) spectroscopy. Luminescent dynamics including fluorescence, phosphorescence, and thermoluminescence of Pr^{3+} in $\text{GdTaO}_4\text{:Pr}^{3+}$ is reported. X-ray diffraction (XRD) spectra indicated that $\text{GdTaO}_4\text{:Pr}^{3+}$ phosphor material is successfully prepared at 1200 deg;C using the solid state reaction method. Red and blue-green emissions were observed upon probing the materials with energetic photons using the DESY synchrotron radiation. A simplified energy transfer scheme explaining energy transfer from the TaO_4 group to either Gd^{3+} states in the $\text{GdTaO}_4\text{:Pr}^{3+}$ system is presented. After-glow measurements were carried out after UV irradiation at room temperature. The phosphorescence lifetime (τ) observed for $\text{GdTaO}_4\text{:Pr}^{3+}$ compound as a result of traps was 620 s. The depth of the trap levels was investigated from the TL data.

Apply to be
 consider for a student
 award (Yes / No)?

yes

Level for award
 (Hons, MSc,
 PhD)?

MSc

Main supervisor (name and email)
and his / her institution

Hendrik C. Swart, SwartHC@ufs.ac.za, University of Free State

Would you like to
 submit a short paper
 for the Conference
 Proceedings (Yes / No)?

Yes

Primary author: Mr NOTO, Luyanda Lunga (University of Free State (Student))

Co-authors: Prof. SWART, HC (University of Free State); Prof. TERBLANS, JJ (University of Free State); Dr GUSOWSKI, Marek (University of Free State); Prof. NTWAEABORWA, OM (University of Free State); Dr PITALE, Shreyas (University of Free State)

Presenter: Mr NOTO, Luyanda Lunga (University of Free State (Student))

Session Classification: DCMPPM1

Track Classification: Track A - Division for Condensed Matter Physics and Materials
