Deliberations from PCCR2 and an African Light Source

Friday, 1 February 2019 14:00 (15 minutes)

The PCCR2 Conference is now also reaching its end.

For a many years, including more recently in the planning stages of PCCR2, there was a vision of a large scale infrastructure for Africa. Indeed sessions with this focus were present in the PCCR2 early programme. It was therefore natural to partner with the AFLS2 Conference. At PCCR2, there has been an excellent spread of contributions, using both lab facilities and also large scale infrastructures. This has enabled the PCCR community to develop its thinking further and to make well founded and deep contributions to this strategic session.
