The International Advisory Committee for the African Light Source Foundation

KEY MISSIONS:

- ***To provide advice and recommendations** on all scientific, technical and capacity-building issues beginning with establishment and completion of a conceptual design report for the African Light Source.*
- ***To promote the high-level liaison and networking** at national, pan-African and high-level world institutions to drive forwards a Light Source for Africa.*
- ***To engage in incisive strategic reflections** ensuring wisdom and judgement in developing the actions to be implemented by the AfLS Committees.*
