Type: Oral Presentation

## The South African Astronomical Observatory

*Tuesday, 5 July 2022 15:30 (30 minutes)*

The South African Astronomical Observatory (SAAO) provides state-of-the-art astronomy research facilities to the South African and global astronomy communities, primarily through its flagship project, the Southern African Large Telescope, but also through a unique suite of other telescopes and instruments. In addition, SAAO hosts a range of international projects, ranging from telescopes and instruments to the global office of Astronomy for Development and the African Astronomical Society. In this talk, I will present the current and future science projects underway at the SAAO, and touch on how these projects and the astronomy research they support contribute to South African society.

**Apply to be considered for a student ; award (Yes / No)?**

No

**Level for award;(Hons, MSc, PhD, N/A)?**

N/A

**Primary authors:** MCBRIDE, Vanessa (Office of Astronomy for Development); Prof. VAISANEN, Petri (South African Astronomical Observatory)

**Presenter:** MCBRIDE, Vanessa (Office of Astronomy for Development)

**Session Classification:** Astrophysics & Space Science

**Track Classification:** Track D1 - Astrophysics
