First year mainstream physics students' conceptions about Kinematics position and displacement concepts

Wednesday, 5 July 2023 14:20 (20 minutes)

Most first year mainstream physics students of the Department of Physics and Astronomy at the University of the Western Cape generally have difficulty solving problems about Kinematics position and displacement concepts. After the COVID -19 the problems seem to have gotten worse. This paper aims to tell the student's conception of the position and displacement in physics learning. The students' conceptions were derived from test results. The tests and findings will be presented and discussed in this paper.

Apply to be considered for a student ; award (Yes / No)?

N/A

Level for award;(Hons, MSc, PhD, N/A)?

N/A

Primary author: Dr HERBERT, Mark (University of the Western Cape)

Presenter: Dr HERBERT, Mark (University of the Western Cape)

Session Classification: Physics for Development, Education and Outreach

Track Classification: Track E - Physics for Development, Education and Outreach
