Development of a high power femtosecond laser

The Laser Research Institute and the CSIR National Laser Centre are developing a high power femtosecond laser system in a joint project with a phased approach. The laser system consists of a fs oscillator and a regenerative amplifier. An OPCPA amplifier and a multi-pass amplifier are under development.

Primary author: Dr NEETHLING, Pieter (Laser Research Institute, University of Stellenbosch)

Co-authors: Prof. ROHWER, Erich (Laser Research Institute, University of Stellenbosch); Prof. SCHWOWERER, Heinrich (Laser Research Institute, University of Stellenbosch); Dr BOTHA, Lourens (CSIR National Laser Centre)

Presenter: Dr NEETHLING, Pieter (Laser Research Institute, University of Stellenbosch)

Track Classification: Track C - Lasers, Optics and Spectroscopy
