IMAGING WITH RADIATION
1st National Conference and Workshop: 23 27 Sept 2013

Contribution ID: **37**   Type: **Oral Presentation**

Analysis of voxel data sets with VGStudio MAX

Tuesday, 24 September 2013 08:30 (20 minutes)

VGStudio MAX is well-known for the quality of images, especially for 3D renderings. While this talk will show images of variousobjects which have been segmented, quantified, compared, or otherwise analyzed with VGStudio MAX, the focus will be on the analyses and the reliability of the results: How does the software support accuracy and reproducibility of results, and what influence does the user have?
