# Preparation and characterization of poly(vinyl alcohol)/graphene composite nanofibers via electrospinning

Tuesday, 8 July 2014 11:50 (20 minutes)

## Abstract content <br> &nbsp; (Max 300 words)<br><a href="http://events.saip.org.za/getFile.py/starget="\_blank">Formatting &<br>Special chars</a>

We report on the synthesis and characterization of electrospun polyvinyl alcohol (PVA)/graphene nanofibers. The samples produced were characterized by Raman spectroscopy for spectroscopy for composition, scanning electron microscopy (SEM) for surface morphology and Thermogravimetric analysis (TGA) for thermal properties. SEM measurements clearly show uniform fiber formation and excellent graphene dispertion within the fibers, while TGA measurements show the improved thermal stability of PVA in the presence of graphene. The synthesized polymer reinforced nano-fibers have potential to serve in many different applications such as thermal management, electrodes and biomedical materials for drug delivery. We successfully incorporated graphene nanofillers into PVA fibers in order to improve the thermal properties of the resulting fibers. Three different source of graphene were used for that purpose and all show improved thermal properties of the fibers after incorporation of the graphene nanofillers. The relatively simple and economical electrospinning technique was used to fabricate continuous fibers. It was realized that the fibers was optimized for this system in term of bead free fibers and thinner fibers. It was realized that the fibers with increasing graphene loading into the PVA fibers.

#### Apply to be<br> considered for a student <br> &nbsp; award (Yes / No)?

Yes

#### Level for award<br>&nbsp;(Hons, MSc, <br> &nbsp; PhD)?

MSc

#### Main supervisor (name and email)<br>and his / her institution

Prof. Ncholu Manyala ncholu.manyala@up.ac.za University of Pretoria

### Would you like to <br> submit a short paper <br> for the Conference <br> Proceedings (Yes / No)?

Primary author: Mr BARZEGAR, Farshad (University of Pretoria)

**Co-authors:** Mr BELLO, Abdulhakeem (University of Pretoria); Mr MOMODU, Damilola (University of Pretoria); Dr DANGBEGNON, Kouadio Julien (Nelson Mandela Metropolitan University); Dr MANYALA, Ncholu (University of Pretoria)

Presenter: Mr BARZEGAR, Farshad (University of Pretoria)

Session Classification: Applied

Track Classification: Track F - Applied Physics
