<i>INVITED TALK:</i> IVS contribution to the ITRF2014

Wednesday, 16 March 2016 12:25 (25 minutes)

Generating the contribution of the International VLBI Service for Geodesy and Astrometry (IVS) to the ITRF2014 was the main task of the IVS Combination Center at the Federal Agency for Cartography and Geodesy (BKG, Germany) in 2015. Starting with the ITRF2005, the IVS contribution to the ITRF is an intra-technique combined solution using multiple individual contributions from different institutions.

For the ITRF2014 nine international institutions were used for a combined solution. The data files contain 24h VLBI sessions from the late 1970s until the end of 2014 in SINEX file format containing datum free normal equations with station coordinates and Earth orientation parameters (EOP). All contributions have to meet the IVS standards for ITRF contribution in order to guarantee a consistent combined solution.

In the course of the generation of the intra-technique combined solution, station coordinate time series for each station as well as a terrestrial reference frame based on the contributed VLBI data (VTRF) were generated and analyzed.

The data analysis, the combination procedure and results of the combined solution for station coordinates and EOP will be presented.

Primary author: BACHMANN, Sabine (BKG)

Co-authors: Dr THALLER, Daniela (Federal Agency for Cartography and Geodesy); Ms MESSERSCHMITT, Linda (Federal Agency for Cartography and Geodesy)

Presenter: BACHMANN, Sabine (BKG)

Session Classification: Oral5: Geodetic and Astrometric Results

Track Classification: 5: Geodetic and Astrometric VLBI Results
