The ESRF model: history, governance, access, key facts and figures and socio-economic impact

Thursday, 19 November 2015 11:00 (20 minutes)

The ESRF is one of the very few cases where a synchrotron light source has been constructed under an Inter-governmental Convention. The ESRF governance, access, budget, procurement, communication, etc. are all framed by this internationality. The aim of the presentation is therefore to outline the ESRF model: how it operates in terms of governance and funding, key facts and figures, the ESRF access system, the return to its partner countries and its socio-economic impact.
