The unusual Seyfert Markarian 926 - a link to the LINERs?

Friday, 15 July 2011 12:30 (15 minutes)

Markarian 926 (= MCG-2-58-22) is one of the earliest Seyfert galaxies identified. At discovery it was one of the most luminous nearby active galactic nuclei (AGN), with strong, wide broad lines. In the late 1980's it started fading, eventually settling at barely 10
