## Metal Oxide N-doped CNTs decorated Gas sensors

Wednesday, 6 July 2016 16:10 (1h 50m)

**Abstract content** (Max 300 words) **Formatting** **Special chars**

Carbon nanotube (CNTs) continues to exhibit great potential in their applications as chemical sensors due to their unique chemical and physical properties [1-3]. These hexagonal networks of carbon atoms have been used principally due to their large surface area and their ability to fine tune the electrical properties to increase surface reactivity to reagents such as CH<sub>4</sub>, CO, H<sub>2</sub>. In this work N-doped MWCNTs (CN<sub>x</sub>) were synthesised using horizontal chemical vapour deposition (CVD) at 850 °C and decorated with metal oxides for sensor applications. The dependence of structural disorder and electrical properties on nitrogen concentration on CNTs is established. Furthermore functionalization of CN<sub>x</sub> through the side wall decoration with metal oxide (SnO<sub>2</sub> and CuO) nanoparticles has been carried out to enhanced surface reactivity. The physico-chemical properties of the decorated CN<sub>x</sub> have been carried using XRD, Raman, TEM and EDX to establish the coverage and disorder of the nanoparticles onto CN<sub>x</sub> matrix. As a proof of concept decorated CN<sub>x</sub> were tested for gas sensing applications through measurements of the change in electrical resistance as a function of analyte composition (0-250ppm) at varying temperatures (300K-700K).

**Apply to be considered for a student award (Yes / No)?**

Yes

**Level for award (Hons, MSc, PhD, N/A)?**

PhD

**Main supervisor (name and email) and his / her institution**

Dr D.M. Wamwangi, School of Physics, University of the Witwatersrand, Johannesburg

**Would you like to submit a short paper for the Conference Proceedings (Yes / No)?**

Yes

**Please indicate whether<br>this abstract may be<br>published online<br>(Yes / No)**

Yes

**Primary author:** Mr USMAN, Ibrahim B. (University of the Witwatersrand)

**Presenter:** Mr USMAN, Ibrahim B. (University of the Witwatersrand)

**Session Classification:** Poster Session (2)

**Track Classification:** Track F - Applied Physics
