High temperature and phase transformation studies of Pt₃Al compounds

Tuesday, 5 July 2016 16:10 (1h 50m)

Abstract content (Max 300 words) **Formatting & Special chars**

Platinum group alloys, particularly the Pt₃Al alloys are of importance in high temperature environment, such as aerospace and gas turbine. The Pt₃Al exist in four phases that is L1₂, DOc, DOc' and tP16; the L1₂ is stable at high temperatures (HT) and transforms to tetragonal phases at low temperature (LT). In particular, the cubic L1₂ Pt₃Al is ductile but unstable, while the lower temperature (LT) phase which has the tetragonal lattice DOc' is stable but brittle. However, the tetragonal tP16 is observed to be the ground-state structure at lower temperature. In this study, the relative phase transformation behaviour from L1₂ to tP16 and DOc' has been investigated using Molecular Dynamics within the LAMMPS code. The calculated X-ray diffraction (XRD) pattern reveals a transformation trend from L1₂ to DOc' and L1₂ to tP16 between 400K and 1300K. The observed L1₂ to DOc' XRD peaks vanishes above 800K, while the L1₂ to tP16 peaks are observed above 1000K. This confirms that the DOc' and L1₂ are stable below 800K and above 1000K, respectively. The L1₂ to tP16 transformation showed distinct XRD peaks above 800 K. The L1₂ XRD pattern are consistent with the experimental results, and also confirms that the tP16 phase is stable below 1000K.

Apply to be considered for a student award (Yes / No)?

yes

Level for award (Hons, MSc, PhD, N/A)?

MSc

Main supervisor (name and email) and his / her institution

H.R Chauke, hr.chauke@ul.ac.za, University of Limpopo

Would you like to submit a short paper for the Conference Proceedings (Yes / No)?

NO

**Please indicate whether
this abstract may be
published online
(Yes / No)**

No

Primary author: Ms MKHONTO, CRESTINAH (SAIP MEMBERSHIP)

Co-authors: Prof. CHAUKE, Hasani (University of Limpopo); Prof. NGOEPE, Phuti (University of Limpopo)

Presenter: Ms MKHONTO, CRESTINAH (SAIP MEMBERSHIP)

Session Classification: Poster Session (1)

Track Classification: Track A - Division for Physics of Condensed Matter and Materials
