An overview of laser source development at the CSIR National Laser Centre is presented.

A number of different laser sources, based on various architectures were developed to fulfill a diverse range of needs. These systems included ultra-compact short-pulse 1 micron lasers, Large Mode Area (LMA) mid-infrared fibre lasers, bulk solid-state lasers and amplifiers, as well as Optical Parametric Oscillators (OPOs).

The ultra-compact 1 micron lasers delivered multi-kW peak powers in nanosecond pulses at Pulse Repetition Frequencies (PRF) in excess of 100 kHz. This laser prototype was developed for use in ranging applications.

Development of 2 micron, high-power bulk lasers and amplifiers for use as OPO pump sources as well as free space propagation has also proven highly successful, culminating in the successful completion of a fieldable Ho:YLF laser and amplifier system, delivering up to 60 W of laser power in a near-diffraction limited beam.

We are also investigating mid-infrared parametric sources emitting in the 3 to 5 micron region. Sources in this wavelength region have applications in several fields, including medicine, optical communication, and defence. Results obtained thus far are very promising, with up to 14 W of output power demonstrated from a single-crystal OPO emitting at 4 micron.

In conclusion, we present our vision and future strategy for aiding both the South African Photonics research community as well as industry.

**Apply to be<br> considered for a student <br> &    award (Yes / No)?**

No

**Level for award<br>&   (Hons, MSc, <br> &    PhD, N/A)?**

N/A

**Main supervisor (name and email)<br>and his / her institution**

N/A

**Would you like to <br> submit a short paper <br> for the Conference <br> Pro<br>ceedings (Yes / No)?**

No

**Please indicate whether<br>this abstract may be<br>published online<br>(Yes / No)**

Yes

**Primary author:** Dr STRAUSS, Hencharl (CSIR (National Laser Centre))

**Co-authors:** Mr JACOBS, Cobus (CSIR National Laser Centre); Mr MORRIS, Daniel (University of Pretoria); Dr WU, Lorinda (CSIR-NLC); Dr KOEN, Wayne (CSIR National Laser Centre)

**Presenter:** Dr STRAUSS, Hencharl (CSIR (National Laser Centre))

**Session Classification:** Photonics

**Track Classification:** Track C - Photonics
