Relatively small resonances on the low-energy tail of the giant electric dipole resonance such as the scissors or pygmy resonances can have significant impact on reaction rates. These rates are important input for modelling processes that take place in astrophysical environments and nuclear reactors. Recent results from the University of Oslo indicate the existence of a significant enhancement in the photon strength function for nuclei in the actinide region due to the scissors resonance [1]. Further, the M1 strength distribution of scissors resonances in rare earth nuclei has been studied extensively over the years [2]. In order to investigate the extent and persistence of the scissor resonance in other mass regions, an experiment was performed utilizing the NaI(Tl) gamma-ray detector array (CACTUS) and silicon particle telescopes (SiRi) at the cyclotron laboratory at the University of Oslo. Particle-gamma coincidences from the $^{181}\text{Ta}(d,p)^{182}\text{Ta}$ reaction were used to measure the nuclear level density and photon strength function of the well-deformed ^{182}Ta system, to investigate the existence of resonances below the neutron separation energy. In this talk I will present and discuss the results of this investigation and place our findings in the context of previous work.

This work is based on the research supported in part by the National Research Foundation of South Africa Grant Number 92600.

Apply to be
 considered for a student
 award (Yes / No)?

Yes

Level for award
 **(Hons, MSc,
 PhD, N/A)?**

MSc

Main supervisor (name and email)
 and his / her institution

Mathis Wiedeking
wiedeking@tlabs.ac.za
iThemba LABS

Would you like to
 submit a short paper
 for the Conference
 Proceedings (Yes / No)?

No

**Please indicate whether
this abstract may be
published online
(Yes / No)**

Yes

Primary author: Mr BRITS, Christiaan (University of Stellenbosch)

Co-authors: Prof. GORGEN, A. (University of Oslo); Dr LARSEN, A.C. (University of Oslo); Mr KHESWA, Bonginkosi (iThemba LABS); Dr BLEUEL, Darren (Lawrence Berkeley National Laboratory); Dr SAHIN, E. (University of Oslo); Dr GIACOPPO, F (University of Oslo); Mr ZEISER, F.B. (University of Oslo); Mr BELLO GARROTTE, F.L. (University of Oslo); Ms TVETEN, G.M. (University of Oslo); Dr NYHUS, H.T. (University of Oslo); Dr HADYNSKA-KLEK, K. (University of Oslo); Prof. GUTTORMSEN, M. (University of Oslo); Ms KLINTEFJORD, M. (University of Oslo); Prof. PAPKA, P. (iThemba LABS/ University of Stellenbosch); Ms ROSE, S. (University of Oslo); Prof. SIEM, S. (University of Oslo); Ms RENSTROM, T. (University of Oslo); Ms HAGEN, T.W. (University of Oslo); Mr INGEBERG, V.W. (University of Oslo)

Presenter: Mr BRITS, Christiaan (University of Stellenbosch)

Session Classification: Nuclear, Particle and Radiation Physics (1)

Track Classification: Track B - Nuclear, Particle and Radiation Physics
